Tips On Printing Certificates From Different Browsers

The certificate should download directly using **Safari** or **Firefox**, but sometimes other browsers require an extra step.

Example using CHROME: If you get this screen and it pauses.....

Loading certificate

In approx. 2 seconds the certificate should load. If it doesn't please select the link above.

then right-click on "certificate", and "Save link as" to download your certificate.

Example using Microsoft Edge: If you get this screen...

Loading <u>certificate</u>	Downloads	Q ~~ \$
In approx. 2 seconds the certificate should load. If it doesn't please select the link above.	K6MM_CQPCertCertificate (1).pdf can't be downloaded securely	
	See more	

then click SEE MORE, and Downloads:

≡ Do	wnloads	Q Search all files			
All 1	iles nber 31, 2022		Ŵ	Ø	
8	K6MM_CQPCertCertificate (3).pdf https://www.cqp.org/printCQP2022Cert.php?FORM=CQPCert&NAME=John+Miller&CALL=K6MM&OPS=& This file can't be downloaded securely	TESTN	IODE=&MESS Keep	AGE=CI. Delete	

then click **KEEP** to download the certificate.

These interim steps are annoying but are related to the Security settings chosen for your browser.
